PREVENTIVE MEDICINE GRAND ROUNDS

Special Session with HRSA's Office of Women's Health and Substance Abuse and Mental Health Services Administration

TUESDAY, JUNE 4, 2019 1:00 – 2:30 P.M. (ET)

Screening and Referral: Evidence-Based Eating Disorder Treatment in Primary Care Practice

The 21st Century Cures Act—signed into law in December 2016—provides funding for the acceleration of research into prevention and cures for serious illnesses and addresses improvements in mental health service delivery, among other related topics. Section 13006 of the Cures Act addresses the identification of model programs and materials for educating and training health professionals around prevention, early intervention, and appropriate treatment services for individuals with eating disorders. In this Grand Rounds, the presenters will discuss evidence-based practices and approaches to detect and manage eating disorders in primary care.

This presentation illustrates the Preventive Medicine Residency and Fellowship's training focus on applying systems-based approaches to ensure quality of population health services.

Speakers

Christine M. Peat, PhD

Director, National Center of Excellence for Eating Disorders; Assistant Professor of Psychiatry, UNC-Chapel Hill, North Carolina

Louise D. Metz, MD

Owner, Lead Physician, Mosaic Comprehensive Care, Chapel Hill, North Carolina
