

The National Center of Excellence for Eating Disorders (NCEED) is the nation's **first and only** federally-funded center of excellence dedicated to eating disorders. Based at the University of North Carolina at Chapel Hill since 2018, NCEED serves as a centralized hub dedicated to eating disorder education and training for both healthcare providers and the general public.

## Our Mission

Our mission is to advance education and training of healthcare providers and to promote public awareness of eating disorders and eating disorder treatment.

Our goal is to ensure that all individuals with eating disorders are identified, treated, and supported in recovery.

### NCEED Education and Training

NCEED is a central source for aggregated, vetted, evidence-based resources and guidance for healthcare providers. Our scalable, adaptable technical assistance serves healthcare providers in multiple ways that align with how they practice.

NCEED provides training from clinicians, researchers, and advocates who specialize in eating disorder care. They lend their experience to webinars, online courses, white papers, and other educational platforms.

#### Partner Toolkit

Share information about NCEED with your stakeholders

### Resources for the General Public

Even though eating disorders are serious conditions, they can be identified and treated effectively. NCEED provides easy-to-use materials and toolkits to help people understand eating disorders. They are useful for individuals, family members, and healthcare providers alike. These resources empower people with the knowledge and skills they need to make a difference.

#### Funding Statement

Funding for the National Center of Excellence for Eating Disorders was made possible by Grant No. H79SM081924 from SAMHSA of the U.S. Department of Health and Human Services (HHS). The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement by, SAMHSA/HHS, or the U.S. Government.
